

Quantitative Methods in Chemistry

Week 4, Lecture 4

NPTEL

Solved Examples of ANOVA and LSD

Q. Five groups of students were administered a test, and their marks obtained out of 15 are tabulated below. Do their means differ significantly at the confidence level of 95%?

Group 1	Group 2	Group 3	Group 4	Group 5
10.3	9.5	12.1	9.6	11.6
9.8	8.6	13.0	8.3	12.5
11.4	8.9	12.4	8.2	11.4

Means	10.5	9.0	12.5	8.7	11.8
SD	0.818535	0.458258	0.458258	0.781025	0.585947

You may apply an “eye ball” test to intuitively “feel” the data.

Steps of ANOVA

1. State the **null hypothesis** (H_0) and the **alternate hypothesis** (H_a).
2. Calculate the **Grand Average** for this data set.
3. Calculate the sum of squares due to factor (**SSF**).
4. Calculate the sum of squares due to errors (**SSE**).
5. Calculate the mean square factor (**MSF**).
6. Calculate the mean square error (**MSE**).
7. Calculate the F_{test} value = MSF / MSE .
8. Compare F_{test} with F_{crit} .

NPTTEL

ANOVA Table

Source of Variation	Sum of Squares	Degrees of Freedom	Mean Squared Values	F
Between the groups (Factor Effect)	SSF = 33.54	$I - 1 = 4$	$MSF = SSF / I - 1 = 8.385$	$F_{\text{test}} = MSF / MSE = 20.5$
Within the group (Error Effect)	SSE = 4.09	$N - I = 10$	$MSE = SSE / N - I = 0.409$...
Total	SST = 37.63	$N - 1 = 14$

$$F_{\text{crit}} (95\%, 4, 10) = 3.48$$

NPTTEL

Since $F_{\text{calc.}} > F_{\text{crit}}$, reject null hypothesis.

Calculate the LSD value

A partial ANOVA Table is provided below for a study conducted on 3 different groups of students, with each group containing 5 students.

Source of Variation	Sum of Squares	Degrees of Freedom	Mean Squared Values	F
Between the groups (Factor Effect)	SSF = ??	??	MSF = ??	$F_{\text{test}} = ??$
Within the group (Error Effect)	SSE = ??	??	MSE = 0.0081	...
Total	SST = 0.374	??

Based on the information provided above, fill in the remaining entries (marked with ??).

Source of Variation	Sum of Squares	Degrees of Freedom	Mean Squared Values	F
Between the groups (Factor Effect)	SSF = 0.2768	2	MSF = 0.1384	$F_{\text{test}} = 17.09$
Within the group (Error Effect)	SSE = 0.972	12	MSE = 0.0081	...
Total	SST = 0.374	14

NPTTEL
