

Chapter Objective

1. To be understand the concept of wave energy systems
2. To be able to analyse the energy in the wave

Chapter Motivation

In communities near the coastal areas, the wave energy could be a very useful source consistent energy.

Sample Questions

1. What is the wave energy potential for India?
2. What is the relationship to estimate the wave energy?
3. What are the problems associated with utilization of wave energy?
4. What are the categories of wave energy collection devices?
5. What are shoreline devices? Explain.
6. What are off shore devices? Explain.
