

# Contents

<b>1</b>	<b>Properties of Integers and Basic Counting</b>	<b>5</b>
1.1	Basic Set Theory . . . . .	6
1.2	Well Ordering Principle and the Principle of Mathematical Induction . . . . .	8
1.3	Strong Form of the Principle of Mathematical Induction . . . . .	11
1.4	Division Algorithm and the Fundamental Theorem of Arithmetic . . . . .	13
1.5	Relations, Partitions and Equivalence Relation . . . . .	17
1.6	Functions . . . . .	21
1.7	Distinguishable Balls . . . . .	25
1.8	Binomial Theorem . . . . .	27
1.9	Onto Functions and the Stirling Numbers of Second Kind . . . . .	29
1.10	Indistinguishable Balls and Distinguishable Boxes . . . . .	32
1.11	Indistinguishable Balls in Indistinguishable Boxes . . . . .	34
1.12	Lattice Paths and Catalan Numbers . . . . .	36
1.13	Catalan Numbers Continued ... . . . .	39
1.14	Generalizations . . . . .	41
<b>2</b>	<b>Advanced Counting and Generating Functions</b>	<b>45</b>
2.1	Pigeonhole Principle . . . . .	45
2.2	Pigeonhole Principle Continued ... . . . .	47
2.3	Principle of Inclusion and Exclusion . . . . .	49
2.4	Formal Power Series . . . . .	52
2.5	Formal Power Series Continued ... . . . .	55
2.6	Application to Recurrence Relation . . . . .	59
2.7	Application to Recurrence Relation Continued ... . . . .	62
2.8	Application to Recurrence Relation Continued ... . . . .	65
2.9	Applications to Generating Functions Continued ... . . . .	68
<b>3</b>	<b>Groups and Polya Theory</b>	<b>71</b>
3.1	Groups . . . . .	71
3.2	Example of Groups . . . . .	75

3.3	SubGroups . . . . .	80
3.4	Lagrange's Theorem . . . . .	83
3.5	Applications of Lagrange's Theorem . . . . .	86
3.6	Group Action . . . . .	88
3.7	Group Action Continued ... . . . .	92
3.8	The Cycle Index Polynomial . . . . .	94
3.8.1	Applications . . . . .	95
3.9	Polya Inventory Theorem . . . . .	98
<b>4</b>	<b>Topics in Classical Graph Theory</b>	<b>103</b>
4.1	Basic Graph Theory . . . . .	104
4.2	Graph Operations . . . . .	108
4.2.1	Characterization of trees . . . . .	111
4.3	Matrices related with Graphs . . . . .	114
4.4	Matrix Tree Theorem . . . . .	117
4.5	Eulerian graphs . . . . .	120
4.6	Planar Graphs . . . . .	123
4.7	Euler's Theorem for Planar Graphs . . . . .	126
4.8	Stereographic Projection . . . . .	129
<b>5</b>	<b>Module-wise Exercises</b>	<b>131</b>
	<b>Index</b>	<b>154</b>
