Bainitic transformation

Questions:

1. What is the difference in the microstructure of a eutectoid alloy, when it is subjected to annealing and normalizing?
2. What is the difference in the microstructure of a hypo eutectoid alloy, when it is subjected to annealing and normalizing?
3. What is the difference between austempering and martempering?
4. Why does ferrite form in an acicular manner at lower temperature (bainite domain)
