Course Week 7 Assessment outline The due date for submitting this assignment has passed. Due on 2020-03-18, 23:59 IST. How does an As per our records you have not submitted this assignment. **NPTEL** online course work? 1) Let (X, \mathcal{F}, μ) be a measure space. Then, 1 point Sigma algebras, Measures and $f, g \in L^1(\mu)$ implies $fg \in L^1(\mu)$ Integration Integration and $f, g \in L^2(\mu)$ implies $fg \in L^2(\mu)$ convergence theorems $f, g \in L^2(\mu)$ implies $fg \in L^1(\mu)$ Outer measure $f \in L^1(\mu)$ and $f \in L^{\infty}(\mu)$ implies $f \in L^2(\mu)$ Lebesgue No, the answer is incorrect. Score: 0 measure and its Accepted Answers: properties $f, g \in L^2(\mu)$ implies $fg \in L^1(\mu)$ $f \in L^1(\mu)$ and $f \in L^{\infty}(\mu)$ implies $f \in L^2(\mu)$ Lebesgue measure and 2) Which of the following are true? 1 point positive Borel measures on locally compact $L^{1}[0,1] \subset L^{2}[0,1]$ spaces $L^1[0,\infty) \subset L^2[0,\infty)$ Lebesgue measure and invariance $L^{2}[0,1] \subset L^{1}[0,1]$ properties

$L^2[0,\infty) \subset L^1[0,\infty)$	
No, the answer is incorrect. Score: 0	
Accepted Answers: $L^2[0,1] \subset L^1[0,1]$	
3) Let $f = \chi_{[0, \frac{1}{2}]}$. Then,	1 point
f is continuous almost every where with respect to the Lebesque measure on \mathbb{R}	
No, the answer is incorrect.	
Accepted Answers:	
4) Which of the following are correct?	1 point
$\chi_{ x \le 1}(x) x ^a \in L^1(\mathbb{R}^n) \text{ iff } a > -n$	
$\chi_{ x \le 1}(x) x ^a \in L^1(\mathbb{R}^n) \text{ iff } a < -n$	
$\chi_{ x \ge 1}(x) x ^a \in L^1(\mathbb{R}^n) \text{ iff } a > -n$	
No, the answer is incorrect. Score: 0	
$\chi_{ x \leq 1}(x) x ^a \in L^1(\mathbb{R}^n)$ iff $a > -n$	
5) Let $f : \mathbb{R} \to \mathbb{R}$ be a measurable function. Then,	1 point
$f \in L^1(\mathbb{R})$ implies f is bounded	
$f \in L^1(\mathbb{R})$ and f is continuous implies that $\lim_{ x \to \infty} f(x) = 0$	
$f \in L^1(\mathbb{R})$ and f is uniformly continuous implies that f is bounded.	
Score: 0 Accepted Answers:	
$f \in L^1(\mathbb{R})$ and f is uniformly continuous implies that f is bounded	
6) Let $f_n : [0, 1] \to \mathbb{R}$ be defined by $f_n(x) = x^n, x \in [0, 1]$ for $n = 1, 2, 3, \dots$. Whe the following are correct?	ich of 1 point
	No, the answer is incorrect. Score: 0 Accepted Answers: $L^2[0, 1] \subset L^1[0, 1]$ 3) Let $f = \chi_{[0, \frac{1}{2}]}$. Then, f is continuous almost every where with respect to the Lebesgue measure on \mathbb{R} f can be approximated by continuous functions in the L^{∞} norm There exists a continuous function g such that $f = g$ almost every where No, the answer is incorrect.
