

4(b). Types of weather forecast and details -contd.

Dr. T.N. Balasubramanian

Integrated Weather forecast

- Integration means integrating, long range, medium range and short range, and given to farmers from single source with agro advisory in temporal dimensions.

Forecast types and Farm Decision to be Taken

Steps to be followed	Single source to be nominated	Agro advisory to be given
1.Long range	IMD	Area to be cultivated, crops and technology to be selected (crop planning), input management including labor
2.Medium range	IMD	land preparation, Sowing, fertilizer application, plant protection etc.,
3.Short range	IMD	Harvest, water management, plant protection etc.,

Priority of Communication and Farm Decisions Under Integrated Weather forecast through Single Window
